

SILO COVERS

PIVOTING COVER

PRINCIPLE

The cover comprises one light-built panel mounted on pivots. The opening and closing function is controlled by hydraulic valves.

ADVANTAGES

- Full silo opening,
- No need to level the fuel by hand if the cover is raised in relation to the road.

DEFAULTS

- System not suitable for use in mountainous areas because of snow (strength of the structure and need to clear the snow before opening).
